

Pre-Session Prerequisites

Introduction to SQL and Relational Databases (PostgreSQL)

Please read and complete this checklist before the session. Arriving prepared means you can participate fully from the very first exercise.

Your Pre-Session Checklist

1. Your Laptop (Windows 10/11, macOS 12+, or Ubuntu 20.04+)

- Laptop charger
- Notebook and pen

Chromebooks and tablets are not supported.

2. Software Requirements

Install PostgreSQL 16

Download and install PostgreSQL 16 using the steps outlined in the video below:

 [How to Install PostgreSQL on Windows](#)

Session format

- The session runs for 3 hours with a lunch break at the halfway point
- You will write real SQL from the first module. This is a practical session, not a lecture
- Exercises are built into every module, with time to work independently before reviewing answers together
- There are no silly questions. If something is unclear, ask

NOTE

If your software is not installed before the session, you will fall behind quickly as exercises begin in the first 15 minutes.
